

## **Malaria Research Assistant - Wauwatosa**

Since 1986 Shoreland has been the leading global provider of time-sensitive, decision-relevant travel and environmental medicine risk information. On a daily basis, Shoreland's digital Travax platform provides continuously updated data on international in-country health threats, risks, counter-measures, and resources. The subscriber base includes federal government agencies, Fortune 100 multinational corporations, NGOs, travel operators, public health agencies, and individual medical providers. Primary users are medical directors and other clinical personnel responsible for the health, safety, and medical needs of travelers and those posted overseas.

A core Travax feature is its malaria maps, a proprietary data-driven collection of country-by-country digital maps that provide targeted geographic recommendations on malaria prevention. Shoreland is seeking talented candidates to apply for the position of malaria research assistant. The primary scope of this position involves extensive, targeted data searching and retrieval in order to obtain timely, reliable, and geographically specific information pertaining to malaria transmission in all countries where the disease is endemic. This is a salaried full-time position that includes competitive compensation, medical benefits, and a 401(k) plan. The position is located in our Milwaukee, WI office.

### **Responsibilities**

- Acquisition and archival of malaria-related reports and other supporting documentation
- Review and preliminary analysis of malaria case totals, incidence rates, and population data
- Formal presentation of research results in accordance with established formatting protocols
- Additional opportunities to be determined based on company needs and employee capabilities

### **Qualifications**

- Bachelor's degree in geography, health sciences, or related fields
- Excellent proficiency with standard Microsoft Office applications (Word, Outlook, Excel)
- Firsthand experience with Geographic Information Systems (GIS)
- Familiarity with global geography (names/locations of countries, regions, capitals, etc.)
- Strong detail orientation
- Excellent communication and time-management skills

### **Desirable Attributes**

- GIS certification
- Experience with Microsoft OneNote
- Familiarity with tropical medicine, infectious diseases, occupational health, public health, or travel medicine
- International travel experience or residence overseas
- Literacy in one or more foreign languages

**Applicant Information**

Competitive applicants will be required to complete a malaria data search and retrieval exercise to evaluate several of the qualifications listed above. We anticipate a start date rapidly upon acceptance of an offer. Persons accepting a position with Shoreland will be required to furnish proof of eligibility to legally work in the U.S. within 3 days of the start date.
